SUMMARY

Digital Account & Project Manager, with over 8 years of experience working with different clients initiating and guiding digital projects from strategy to completion, ensuring the right mix of resources to deliver on time, meeting client expectations and project financials.

What I do is quite simple:I make things happen!

How do I do it?, well there's the trick, in the digital world if you want to make things happen you need to have the right mix between digital knowledge, experience, organization, temper and of course patience.

Those are all things that I bring to the table to assure both my clients and my team feel happy not only with the impressive websites and apps being build but also with the general process of building them were they can count on me to guide them from strategy to completion.
